Joe Cowan

My name is Joseph Cowan. I am a UI/UX designer and full-stack web application developer who also dabbles in game design. I'm unashamedly self-taught and driven creativity and curiosity. I believe every project in my care is a personal extension of myself and my values. I am honest and upfront and don't shy from discussing issues in a way that is sensitive and beneficial to all people involved. I wear my heart on my sleeves, and that translates to my work ethic.

CNC Resources — *Web Programmer*

Jacksonville, FL | Feb 2020 - Current

I currently work as part of the programming department of a claims company designing tools for employees. I have worked on a legacy code team, a React UI/UX team, and have been the sole developer for our HR Portal and a Google Map React API Application.

Paperless Pay — *Web Developer/Designer*

Jacksonville, FL | OCT 2017 - JUNE 2019

I worked as part of a small web development team working on several websites and web tools for internal employees. Most of the content for my projects involved building UI for users to manage their accounts and schedules.

Aramsco— *CSR / Inside Sales*

Salt Lake CIty, UT & Jacksonville, FL | FEB 2012 - OCT 2017

I helped educated and troubleshoot with customers in regards to our products. My experience in customer service has strongly shaped the way I value user experiences.

U.S. Marine Corps — *Infantry / Security Forces*

Mulitple Locations | SEPT 2008 - MARCH 2012

I served as a combative member of the armed forces. My time serving in the Marines gave me a strong work ethic and ability to adapt to difficult situations.

PUBLIC PROJECTS

highlightsandskincare.com— *Spa Salon Website, 2019*

Built a WordPress-style website for a local business in my town.

fcyac.com— *Association Management Web App, 2017-2019*

Designed & developed a web app for managing a youth athletic association. This included building a visual game tracker and a schedule automation.

resurrectionjax.com— *Dynamic Portfolio Website, 2017-2020*

Designed & developed a website for a local church using custom UI/UX and some lite bootstrap css. Included a couple custom liturgical apps.

Rhdo.com— *Dynamic Portfolio Website, 2017-current*

Took over a WP site which I later migrated to become a dynamic website which I built from the ground up based around a bootstrap template.

I AM FAMILIAR WITH

METHODS: Agile (SCRUM) | Component Based UI | REST APIs | AJAX | JSON Data | **FRONTEND**: HTML5 | CSS3 | Bootstrap | JavaScript | jQuery | React | Typescipt **BACKEND**: PHP | SQL/MySQL | DynamoDB | AWS **OTHER**: Confluence & Jira | Git | Adobe Suites | macOS | Linux | Windows
